Comprehensive In-House Design

PROJECTS

Bringing it All Together

Multicom prides itself on having developed relationships with 270 of the world's leading manufacturers. With more than 13,000 products available, we have the solution for any industry application.

These products are used to acquire, process and distribute audio, video, data, energy and traffic control signals over fiber optic, copper and coax cable.

Want to stock an item, but don't have the space? Let Multicom be your warehouse. We can ship nearly any product worldwide as if it came directly from your inventory.

As a value-added supplier, Multicom designs distribution systems using AutoCAD and Lode Data; the industry standard for drafting and design.

Multicom's design and engineering team has earned the respect and trust of systems operators and owners throughout the United States, Latin America and Europe.

All system designs include: distribution layout, block diagram and complete priced bill of materials.

Complete headend assembly is also available including, racking, balancing, crating and shipping.

From schools and universities, to stadiums and convention centers, Multicom has the experience to bring your project together from start to finish.
