

## Our Design Team Provides the End-to-End Solution

Multicom is proud of its expertise in the design of an array of distribution systems including:

### All Designs Include:

- Distribution layout
- Headend block diagram
- Rack layout
- Complete priced bill of materials

- Analog/Digital (HDTV)
- COAX/Fiber Optic (FTTx)
- L-Band/CATV

Multicom's design and engineering team has earned the respect and trust of system operators and owners throughout the United States and Latin America.

**Let us prove it to you!**

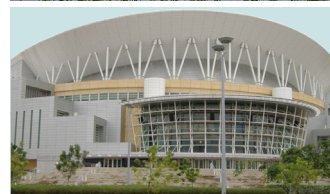

### Major Projects Include:

Multicom designs distribution systems utilizing AutoCAD and Lode Data software; the industry standard for drafting and design.

1,000,000 Sq. Ft. Orange County Convention Center  
Orlando, Florida

Olympic Coliseum  
San Juan, Puerto Rico

Gaylord Palms Hotel & Convention Center  
Kissimmee, Florida

Marriott Brighton Gardens  
80 Locations Nationwide

Edward Jones Dome  
Home of the St. Louis Rams  
St. Louis, Missouri

### Experience

Since 1982 we have worked with engineers and integrators from across the country to design thousands of systems.

### Cost Effective

**Because everything we need is 'In-House':** We are able to choose the most cost effective solution to meet the requirements of your application.

### No Guesswork

**No more guessing when estimating project costs:** We document the specifics of the design - where all cable and components are located - allowing you to make 'apples to apples' comparisons between vendor quotations.
