

Model S Lasher

Series 61200

The **Model S** pull type Lasher is a lightweight, single-lashing lasher that accommodates varying sizes and lengths of lashing wire for added in-field flexibility. It can lash cable(s) from drop wire size up to 1 15/16" maximum outside diameter.

The Model S lasher is compatible, without adjustment, with .061" wire in 650' coils or with .045" wire in 1200' coils. Simple instructions tell how to thread the machine.

The Model S Lasher is a pull type lasher, but an optional S28 stand lets you pre-lash cable to strand before installation. This lasher drum makes one revolution every 13", creating one support per revolution.

| DCD Part # | Model | Max Strand | Max Lash | Wire Size | Spool size | Overall Dims | Weight |
|------------|-------|------------|---------------|---------------|----------------|----------------|--------|
| 61200-000 | S | 1/2" | 1-15/16" dia. | .045" - .061" | 1200 ft / coil | 15" x10" x 10" | 19 lb. |

Model Q Lasher

Series 61100

The **Model Q** hand-type Lasher is made for short span jobs like splicing or repair, traffic light installation, control cables, aerial inserts for underground construction or any job that would be simpler with a hand-held, variable tension lasher.

The Q Lasher adjusts easily according to how you wrap the wire around the tension rollers and is compatible with either .045" or .061" S-type lashing wire.

The rugged body is of cast aluminum with a removable flange for easy leading. Wire tension rollers are of hardened, tool steel.

| DCD Part # | Model | Max Strand | Max Lash | Wire Size | Spool size | Overall Dims | Weight |
|------------|-------|------------|---------------|---------------|----------------------|-----------------|--------|
| 61100-000 | Q | 1/2" | 1-15/16" dia. | .045" - .061" | 225 or 375 ft / coil | 9-1/2" x5" x 3" | 2 lb. |

Although new to DCD, these lashers were previously manufactured by Cable Spinning Equipment Company, Inc. in New London, MN and before that, in Topeka, KS. The original company was founded in the late 1930's by Mr. Dory Neale.

Their history in Lashers goes back to their early patents in 1942 when Mr. Neale had the first ever patent on a Cable Spinner. That was for the one-man spinner shown in the photograph to the right. From those days onward, there have been several other patents and many innovative improvements.

The fact remains that Cable Spinning Equipment have always been focused on providing Lashing equipment that is of the highest quality and many linemen that have been in the business for a few years will remember that image. DCD intends to not only maintain that image, but to grow it with many other new products for the overhead installations that will match the quality and innovation from those early days of Cable Spinning Equipment.
