## XFM Optical Cassettes (Xpress Fiber Management™)

AFL Telecommunications XFM Optical Cassette product line is a family of preterminated fiber modules that streamline the deployment of optical network infrastructure with an incremental growth platform. The XFM Optical Cassettes are available in the industry standard LGX® footprint with a durable black powder coat finish, and are compatible with all 1U-4U LanSystem™ platforms. All modules are clearly labeled with an “A” and “B” positioning reference, to ensure proper polarity is maintained in the network.

### Features

- 12- and 24-port configurations
- Modular design
- Single LGX® slot packages
- Standard configurations include SC-MTP and LC-MTP configurations
- ST, FC, and MT-RJ configurations available on special order
- Compatible with LanSystem and IBX platforms
- Available in black with rear MTP connection
- GR-445B and GR-2866 transitions
- Multimode and Single-mode versions

### Applications

- Data centers
- LAN, WAN and SAN
- Interoffice cross-connects
- Campus environments

### Related Products

- Pre-connectorized MTP ribbon cable assemblies
- LANSystem™ chassis
- AFL Datapipe cable solutions
