

# MUX-12A-IP (Multiplexer; 12:1 ASI-to-IP)

The Blonder Tongue MUX-12A-IP (Multiplexer; 12:1 ASI-to-IP) is designed for cherry-picking applications, allowing operators to create custom-made channel lineups by grooming standard and high-definition (SD/HD) programs on an as-needed basis.

The MUX-12A-IP accepts up to twelve inputs in ASI format, and multiplexes them into to one MPEG-2/H.264 multi-program transport stream, which is then encapsulated and assigned to a single IP address in 1000Base-T Ethernet (GbE) format suitable for distribution over Cat-5 networks.

An identical output transport stream is also available in ASI format. Each ASI input stream can contain up to 12 programs, for a total of 144 input programs. The GbE output (single IPv4 address) can contain up to 20 programs, groomed from any of the available 144 input programs, not to exceed 214 Mbps.

## MUX-12A-IP (Multiplexer; 12:1 ASI-to-IP - Front and Rear Panels:

The multiplexer is EAS-compliant (Emergency Alert System) – operator can assign ASI port #12 as an EAS input which, when activated, will override the content of all other ASI inputs. Comprehensive remote monitoring and control is accomplished via a GUI-based interface using any standard Web.

## Features:

### ASI Input

- Supports 12 ASI inputs, each up to 270 Mbps
- Each ASI input can contain up to 12 programs
- Supports MPEG-2/H.264 Single or Multi Protocol Transport Services (SPTS or MPTS)
- ASI port #12 is user-selectable for EAS messaging
- Performs PCR (Program Clock Reference) correction
- Allows Null Packet insertion & deletion

### Management

- Comprehensive remote GUI-based monitoring/control via front-panel 10/100Base-T Ethernet interface and any standard Web browser

### GbE Output

- Supports up to 20 programs from the total of 144 input programs not to exceed 214 Mbps
- Provides robust protection against IP network jitter and delay
- Supports Uni- and Multi-cast through UDP/RTP protocols
- Supports IPv4, ARP, IGMPv2, and ICMP protocols
- Performs PCR replacement
- Supports variable and constant bitrates
- Provides a single IPv4 address & port

## Specifications:

### INPUT

<b>Connectors</b>	12 x BNC
<b>Format:</b>	DVB-ASI, 270 Mbps
<b>Standard:</b>	ETSI EN 50083-9

### MULTIPLEXING PROFILE

No. of programs per input ASI:	12 Multi-program Transport Stream
No. of programs in GbE output:	20 MPTS max
No. of programs in QAM output:	24 MPTS max over 4 QAM channels (6 MPTS per QAM channel)
No. of PID per program:	6 per SPTS
Packet ID (PID) management:	User-defined editing/re-mapping is allowed
PAT (Program Association Table):	merged if present / created otherwise
PMT (Program Map Table):	merged if present / created otherwise
VCT (Virtual Channel Table):	merged if present / created otherwise
MGT (Management Table):	merged if present / created otherwise
