

KU and WL

Antennas and Mounts

The Blender Tongue 0.90 m offset antenna is stamped from dual-sided galvanealed steel. It features a pole mount with a 0° to 90° elevation adjustment and fits a 2" to 2.5" O.D. pole supplied by the operator. Additional accessories are available for mounting the antenna to a side wall or pitched roof (6453-1), or flat roof (6457-1). The foot print of the flat roof mount is approximately 36" x 35". The feed support accommodates the 6455-R dual LNBF which has a rectangular channel shape. The 0.9 m dish is ideal for MDU applications where additional signal strength is needed that cannot be provided by smaller residential DBS antennas. The antennas and their accessories are all UPS shippable.

○ Specifications

KU0.92 Stock # 6459 R

Size: 0.90 (m), 35.43 (in)
 Frequency Range: 10.95 - 12.75 GHz
 Reflector f/D ratio: 0.59
 Offset Angle: 22.5°
 Gain: 40 dB min @ 12.45 GHz
 Aperture Efficiency: 69.5% min
 Reflector Material: 0.039 Galvanealed Steel
 Mount Material: 0.108 Galvanealed Steel
 Beam Width: 1.9°
 Mounting:
 Pole (standard) 2" - 2 1/2"OD
 Wall Mount
 Non-Penetrating Roof Mount
 Finish: Gray Powder Coat
 LNBF Mounting: Rectangular Channel
