

Drop Cable Compression

HPT Hybrid Pocket Tool Series

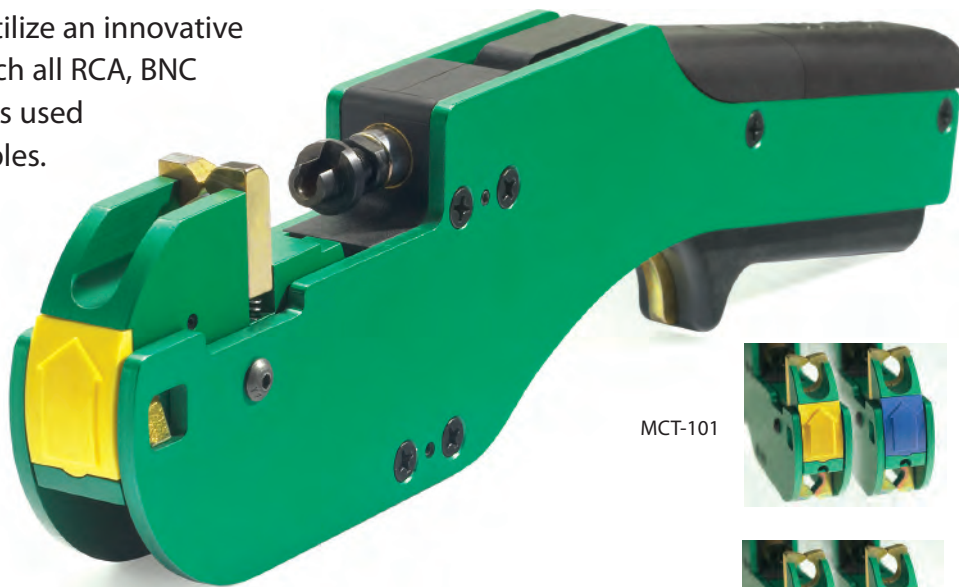

is "built tough" – constructed of reinforced polycarbonate – and attaches all RCA, BNC and F-type compression connectors used on RG-6, -59, -11 and mini coax cables.

- **Ergonomic and compact and lightweight design** can be operated easily and comfortably with either hand.
- **Integrated insertion port** eliminates the need for a separate insertion tool.
- **Improved tool locking mechanism** keeps handle secure during storage
- **Patented and efficient self-releasing dogs** facilitate easy, one-handed cable insertion and removal while ensuring 360-degree connector support.

MCT Multi-Compression Tools utilize an innovative "Spin & Store" technology and attach all RCA, BNC and F-type compression connectors used on RG-6, -59, -11 and mini coax cables. The MCT weighs only 1.0 lbs.

- **Universal plunger tips** support all connector types.
- **360-degree connector support** ensures uniform compression and prevents misalignment.
- **Efficient self-releasing dogs** facilitate easy, one-handed cable insertion and removal.
