

# Multicom's Fiber Media Converter

## Key Features

- Extends traditional Ethernet networks over long distances via Fiber Optics
- 10/100/1000Mb Ethernet speeds
- LED status display
- Power supply Included
- Dual and Single Fiber Available

## Description

Fiber media converters are simple networking devices that make it possible to connect two dissimilar media types such as twisted pair copper cables with fiber optic cabling. Media converters are useful in extending the reach of the conventional 10Mb, 100Mb and 1,000Mb LANs up to 80 Kms. to form one large "campus area network". They are a high performance, cost effective and flexible solution for a wide range of applications in a LAN network.
