This year, ETC Group will become Netceed. This is a defining moment for our group. We're becoming an even stronger partner as an integrated organization with an expanded global footprint and an enhanced product and value-added service portfolio all while staying true to our 30-year legacy of succeeding together with our customers and partners.

Soon, you will get to know us by our new name. Until then, we look forward to continuing to support you and being your premier partner for all your network needs. Together we offer best-in-class technical and logistics solutions for network deployments, upgrades, and maintenance across 14 countries.

We are shaping the future of communication networks with intelligent distribution, supply chain solutions, and customized products across the globe.

Netceed's operations span France, the United States, Germany, Austria, Poland, Portugal, Israel, the Dominican Republic, the UK, the Middle East, Far East, and Northwest Africa.

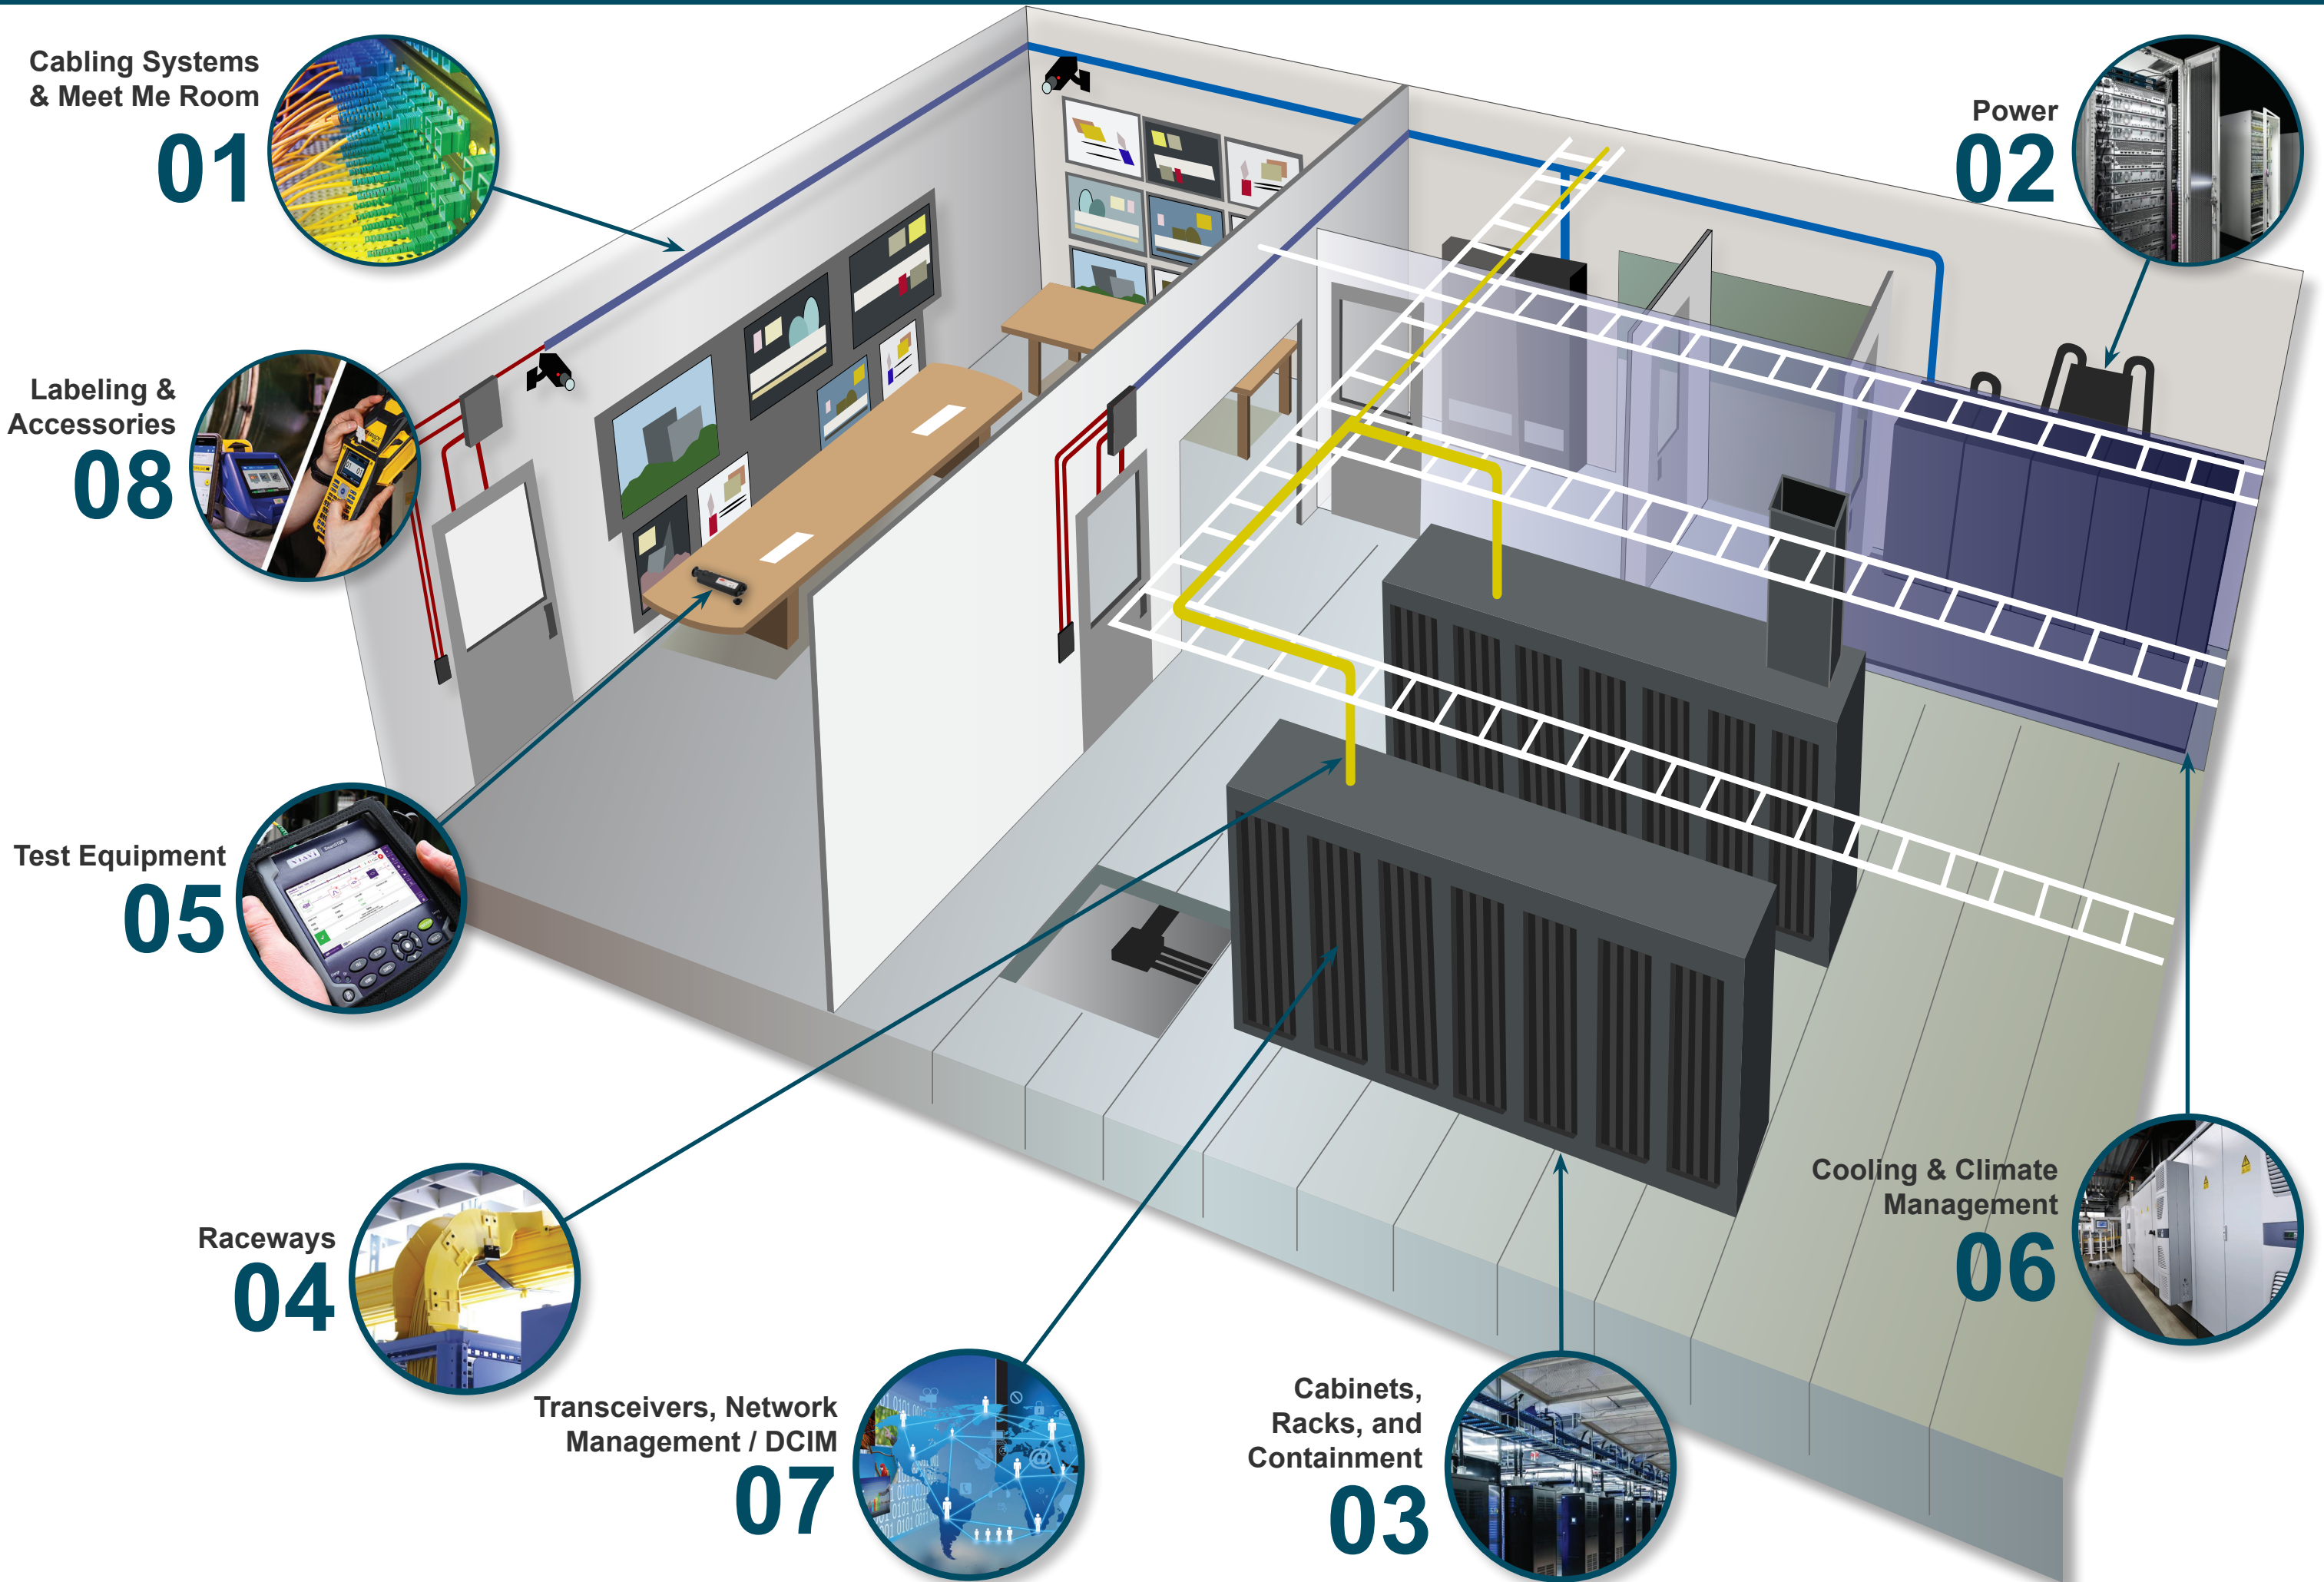

At Netceed, we are built differently. We are committed to delivering the best customer experience and technical expertise as a unified organization. Our unwavering focus is on increasing the speed and reliability of supply chains to open new possibilities for our customers:

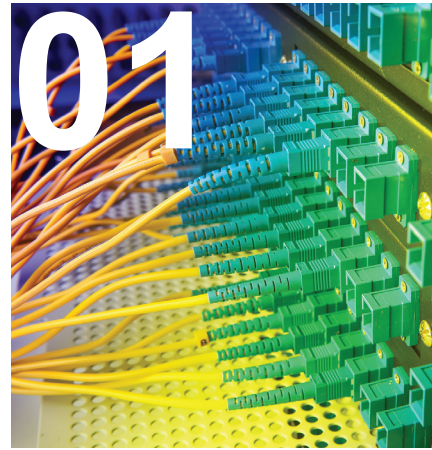

- More certainty in supply availability, on-time delivery, and total cost of ownership (TCO)
- Transformative agility and efficiency for their organizations
- Technical expertise and experience in advanced technology and digital infrastructure solutions
- Enabling the future of connectivity with global reach and scaling potential

With rising demand for capacity, higher speeds, greater bandwidth and lower latencies, our data centre solutions are designed to scale up your data centre infrastructure.

We bring together and partner with the industry-leading manufacturers to optimise space and performance from cabling systems and power through to containment, testing, and certification.

Cabling Systems & Meet Me Room

Lower your network costs, maximize flexibility, and enhance system performance with cabling and connectivity solutions designed to meet the demands of today's dynamic networks. Our proven premier end-to-end copper and fibre solutions support high density, high bandwidth data infrastructure.

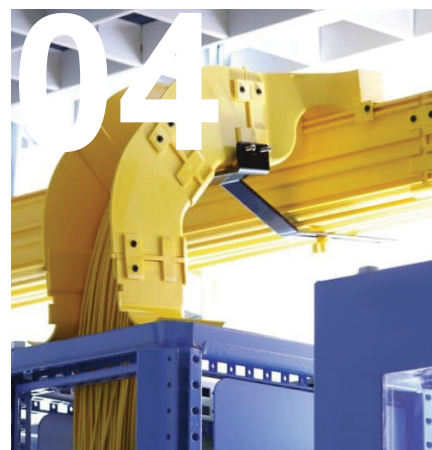

Power

Protect your network with power protection and power management solutions for any networking and data center application. These product solutions include integrated UPS systems, power distribution units (PDUs), power management tools, AC/DC breakers, power cables, lugs, and more.

Cabinets, Racks, and Containment

Netceed brings to market a robust portfolio of cabinet and racking solutions. Whether it is single-tenant or co-location equipment you need, we deliver feature-rich and customizable products that give you the functionality, accessibility, and environmental controls you require.

Raceways

Fibre raceways for the protection and routing of fibre, offering increased flexibility and reduced installation time while maintaining the proper fibre bend radius. Available in a variety of styles and sizes to suit your unique data centre.

Test Equipment

Our test and monitoring products help technicians quickly validate connections and verify throughput. Our complete selection of specialized cabling and termination tools allow for precise cable terminations, connections, and more. We offer test and certification tools for both copper and fibre to deliver the performance your network demands from installation and certification to upgrades and troubleshooting.

Cooling & Climate Management

Our flexible hot and cold aisle containment systems control the airflow around your critical infrastructure. Products include cabinet exhaust systems, filler panels, fan assisted doors, and more. Offering energy and cost saving solutions utilising both DX and water-based functionality, as well as providing traditional and bespoke hot and cold aisle solutions.

Transceivers, Network Management / DCIM

Proactively monitor network performance, reduce costs, and simplify your operations. Netceed offers the right system to ensure energy efficiency and that floor and rack space is utilized in the most effective way possible. Our range of transceivers support the latest 400G spine/leaf topology.

Labeling & Accessories

Netceed provides single-source convenience for all products and instruments needed to complete a comprehensive data centre solution. From raceways to subfloors, and high quality optical transceivers to grommets and blanks, we can source everything you need to complete your data centre project.

is now
