

Description

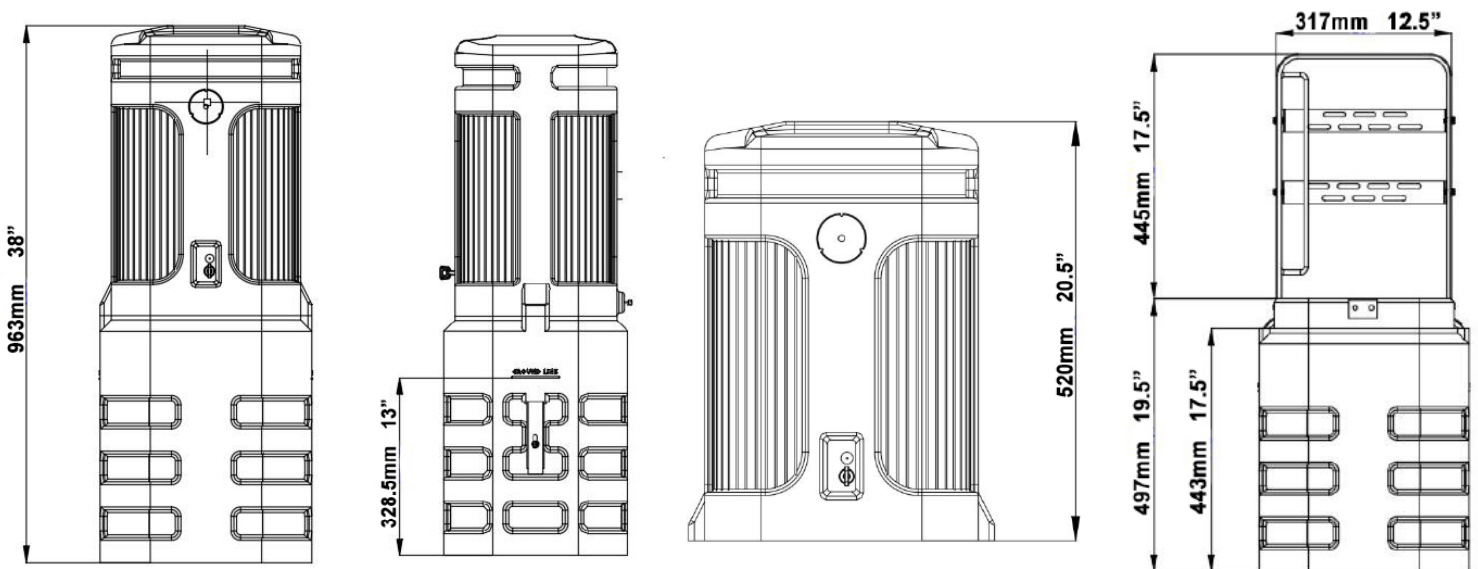

Netceed's line of above-grade pedestals are high-quality, impact-resistant enclosures designed to provide mounting and security for fiber taps, RF taps, line passives, and larger fiber terminals found in today's Fiber-to-the-Home or coaxial-based access networks while providing superior heat dissipation.

Key Features

- Above Grade Pedestal with high quality designed for FTTx network
- Molded of High Density Polyethylene (HDPE), UV resistant, high impact strength
- Two locking system, one P-Key on one side and one captive screw on the other side
- Presence of Ground Line
- Hermetically sealed dome eliminates potential water intrusion and prevents invasion of insects
- Galvanized bracketry
- IP & IK rate: IP65 & IK10
- 15" x 13" x 38" (381 x 330 x 965mm)
