

MUL-280

Auto-Ranging Digital Multimeter

- ▶ Auto-ranging measurement provides simple operation for all measurement types
- ▶ Large $5/8$ " high $3\ 3/4$ " digital display with 33 segment fast analog bar graph provides easy to read "at a glance" operation
- ▶ Full feature multimeter allows testing of diodes, transistors, capacitance, DC & AC voltage and current, frequency, resistance, and continuity with tone alert
- ▶ Data hold switch saves time by ensuring display of maximum level without constant monitoring
- ▶ Manual range override switch disables auto-range feature for in-range testing
- ▶ Overload protected for maximum safety and guaranteed performance
- ▶ 3ft. 1500V double insulated test leads provide a low loss path while providing shock protection for increased safety
- ▶ High impact plastic case and high visibility yellow holster ensure durability and quick identification
- ▶ Includes 9V battery

MUL-280

Auto-Ranging Digital Multimeter

The **Pico Macom MUL-280** full featured hand held auto-ranging multimeter provides a complete voltage and circuit test system in a convenient hand held case. The **MUL-280** enables an extensive array of measurement options all within one easy to operate auto-ranging meter. The level readings display on the large LCD screen in the form of a digital numeric readout and a bar graph for quick easy viewing. Standard measurements include, voltage up to 1000VDC & 750VAC, current up to 10A, resistance up to 3.26 M-Ohm, and continuity with tone alert. Featured measurements include diodes, transistors, capacitance, and frequency up to 200KHz providing the most complete array of testing functionality available in an cost-effective meter. Functionality features include data-hold, overload protection, double insulated leads and a holster that doubles as a table stand for use in test bench applications. **Pico Macom's MUL-280** full-featured hand held auto-ranging multimeter is ideally suited for use in field and test bench environments where high performance and reliable measurements are essential.
