

# ADVANTAGES RUNPOSTICKS

## Optimum for the following application areas

suspended ceilings, cable shafts, hollow walls, post-laid cabling in non-guided lines, underfloor shafts, various leadthroughs etc. ...

### ▶ Basalt rods

Using new basalt technology, extreme bending radii are possible, but the rods still keep their shape and remain

almost unbroken

### ▶ Extra-strong magnet

Can hold metal objects of up to 2.5 Kg

### ▶ RUNPOTEC-stainless steel connections

no rusting

no impact edges

quality-tested manufacture

### ▶ Ball chain

In combination with the magnets, specific location or guidance of chain into wall or masonry openings is possible.

### ▶ Sliding hooks with tip function, overcomes obstacles up to 8.5 cm

Numerous fixing possibilities for cables, perfect sliding properties for all surfaces, specially developed hook with tip function

### ▶ LED lamp

high-powered illumination  
extra long illumination time using AAA Duracell battery,  
extra shockproof

### ▶ patented **RUNPOGLIDER®**

270 Kg pulling load, extremely good bending and sliding behaviour, large eyelet hole, no impact edges

RUNPOGLIDER + eyelet

### ▶ Practical storage bag

Storage compartment for all accessories, carrying belt
