

FLOODGATE[®] FG-9100D

HOSPITALITY HDTV HEADEND FOR DIRECTV[®]

Introducing a new generation of HDTV appliances at the lowest cost per stream in the industry.

16 TO 32 PREMIUM HDTV CHANNELS

The FG-9100D is the premier offering of our new generation of FloodGate products for use with DIRECTV[®] content. Enabling from 16 to 32 premium HDTV channels per unit and having the ability to stack units for expanded capacity, it is suitable for most hotel HDTV channel lineups delivered over RF coax. An optional Electronic Program Guide and a private hotel channel feature may be included in the channel lineup. The FG-9100D delivers content with Pro:Idiom[®] encryption technology, a Hollywood approved standard for protecting content in commercial environments including hotels, motels, timeshares, hospitals, assisted living residences and other bulk commercial locations.

FloodGate installation is very fast and easy using simple Ethernet connections between DIRECTV COM23 receivers, an Ethernet switch, a FloodGate Provisioner, and the FG-9100D.

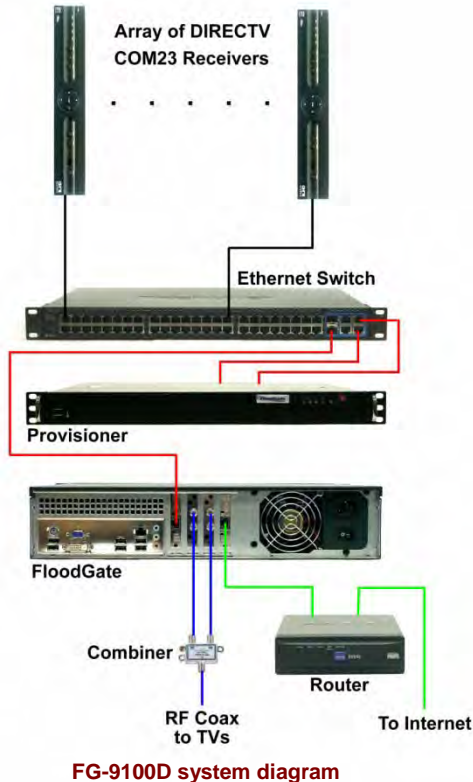

EASY TO MANAGE

The FloodGate Manager Web interface allows you to intuitively manage receiver status, upload a channel lineup, and start and stop service. The FloodGate Manager configures channels automatically on the COM23 receivers based on the channel lineup and then modulates them over a new or existing coax cable infrastructure using QAM technology. SNMP management is included to enable remote monitoring and control for proactive remote service resolution.

- From 16 to 32 HDTV programs
- Receive HD content from DIRECTV[®] COM23 receiver series
- Electronic Program Guide (EPG)
- Private channel payout
- Pro:Idiom[®] content protection without in-room receivers or set-top boxes
- Output over existing coax infrastructure in the hotel
- SNMP management for efficient remote monitoring and control
- Automated configuration for fast and effective installation

Helping you put HDTV wherever people stay...

SPECIFICATIONS

QAM RF Output

Connector: 2 F-type, female
Configuration: 2 blocks of 8 adjacent QAM channels
QAM Modulation: ITU J.83 Annex B; 64, 256 QAM

IP Inputs

Connection: 1 Gigabit Ethernet RJ-45 port
1 10/100Base-T RJ-45 port
Use: Receiver aggregation from switch
Management port

Control and Management

Protocols: SNMPv1, SNMPv2
FloodGate Manager: compatible with IE 7/8 browser

General

Dimensions: 2RU, 15" deep, shelf required
Weight: 21 lb.
Input Voltage: 100-240 VAC, 47-63 Hz
Power: 380 W, 8 Amps
Certifications: FCC - ICAN

Ordering Info

FG-9100D/n: DIRECTV FloodGate, where 'n' is the number (16 – 32) of HD streams licensed
